EECS 293
Software Craftsmanship
2015 Fall Semester

Programming Assignment 13

Due at the beginning of your discussion session on

December 1-4, 2015

No late assignment will be accepted after December 4, 2015

Reading

Chapter 32 and Section 19.6 in Code Complete.

Programming

Make any changes to the AirVille project as required after the code review. Then, comment the project, and extract comments in an external HTML reference manual with JavaDoc. Create a new task in ant (or make) called doc so that ant doc (or make doc) will generate HTML documentation for your code. Do not add the HTML files to the git repository.

Discussion Guidelines

The class discussion will focus on software craftsmanship.
